

# Immediate water supply capacity for up to 1,000,000 people

## THE CHALLENGE

- Infrastructure vulnerable
- Disruption = months
- Population at risk

## THE SOLUTION

- Already operating
- Modular & containerized
- Rapid deployment

Potable water  
capacity

**200 m<sup>3</sup>/day**

200,000 liters/day

No complex  
maintenance

**No consumables**

No membranes, no chemicals

Ultra-low energy  
consumption

**0.7–1 kWh/m<sup>3</sup>**

Off-grid / solar compatible

**15 UNITS = 3,000 m<sup>3</sup>/DAY = DRINKING WATER  
FOR UP TO 1,000,000 PEOPLE**

- Immediate deployment
- No supply chain dependency
- Scalable system

Already validated in real-world pilot deployments.

## 100% BUYBACK GUARANTEE

Production lead time: 3–4 months  
Once disruption occurs,  
it may already be too late

## EMERGENCY ALLOCATION

€5.38M total allocation  
€359,200 per unit  
for April orders

Now selecting early deployment partners
